

CCSS Deeper Study Modules

The CCSS Deeper Study Modules were designed to provide teachers with a guided process to study the Common Core State Standards at an in-depth level. Developed by content teams, the English Language Arts and Mathematics Deeper Study Materials are organized by module and grade band. The materials may be used by individuals or small group for in-depth investigation of the standards. The modules contain both power point slides and companion Microsoft Word team worksheets. The materials are available only by purchasing the source files. Contact Patti Mulcahy for further information about the Deeper Study modules at pmulcahy@cesa7.k12.wil.us.

At CESA 7, structured Deeper Study workshops are offered in 2011-12. [Here's the link for registration.](#) Go to www.cesa7.org and register under "leadership".
